ACKNOWLEDGEMENT

Being a student of Department of Zoology, I have a privilege of working on this project work under the supervision of Mam Joylakshmi Dutta, Department of Zoology, Tinsukia College. I would like to convey my heartfelt thanks to her for her guidance, constant encouragement and critical suggestions throughout the tenure of this project work and making its successful completion.

I would also like to thank Mr. Joynal Abedin, renowned environmentalist and our guide throughout the project work for being a very polite and co-operative guide. His guidance and incitement helped us to explore much more of the faunal diversity.

At last but not the least I am thankful to two of my classmates, Luizee Dutta and Jasmine Kedem Limbu who were involved with this project.
