THEME

The One-Dav International Workshop on Competencies **Development** for **Biodiversitv** Conservation aims to enhance science undergraduates and postgraduates' critical thinking by identifying the knowledge and skills needed for pursuing pathways in biodiversity conservation (including goals to achieving sustainable development and mitigating the climate crisis) through the delivery of instruction of special topics, and breakout and brainstorming sessions. The workshop will provide a platform for participants to engage with an international transdisciplinary expert, share insights, and acquire practical competencies essential for effective conservation practices and determining individual pathways in the field of biodiversity conservation and related.

Prof. Dr. Ramesh Boonratana, a renowned expert in biodiversity conservation, will conduct interactive sessions to impart theoretical knowledge and share practical experiences. Participants will brainstorm ways and methods of applying theoretical concepts to real-world scenarios under guidance. Participants will discuss 'case studies' of biodiversity conservation projects and propose 'best' solutions to remediate or mitigate the threats and impacts. Participants will have the chance to network with professionals, researchers, and fellow students, fostering collaboration and knowledge exchange. The workshop will adopt an interdisciplinary and transdisciplinary approach, integrating the broader natural and social sciences to address the complex challenges of biodiversity conservation. Participants will receive intensive sharing on effective communication strategies for conveying scientific findings to diverse audiences, including policymakers, communities, and the general public, and on understanding the UN-SDGs and GBIF for biodiversity conservation. Participants will receive a certificate of participation, recognising their commitment to enhancing competencies in biodiversity conservation.
