ACKNOWLEDGEMENT

Every project is an experience of triumph, failure and experience that makes us look at a subject of new light. Today I have reached the end of my dissertation report assignment. From the starting till the completion of this project there are many people who guide me and made it possible, whose constant guidance and encouragement crowned my effort with success.

I take the privilege of offering my deep sense of gratitude and indebtedness to my project guide Miss Upasana Phukan for providing me the opportunity to prepare this project report and her valuable inspiration to carry on this project.

I take this opportunity to express my profound and sincere and gratitude to "Dibrugarh University" for providing me such project work as a part of syllabus.

I consider myself proud to be a part of this institution which stood by my way in all possible way. I take this opportunity to acknowledge the timely support and help rendered by Prof. Dr Rupali Gogoi (HOD Zoology Dept) and other teaching staff of the department in completion of my project.

I am very much thankful to my friends who supported me and guide me in every possible way.

To sum up I would say all the above acknowledgers collectively gave wings to my project.

Joishri Gogoi
